PRESS BRAKE SETUP/OPERATOR (Rochester)

Immediate opening for an experienced press brake set up technician. The position involves setting up both coining and air form tooling in a variety of different press brakes. Machines are both CNC and mechanical. The candidate must form good quality parts while working to an hourly production rate. Other miscellaneous tasks throughout the shop may be required depending on the workload.

Requirements:

3- 5 years experience setting up press brakes to form sheet metal parts made of .020 - .375" thick steel, stainless steel or aluminum.

Other sheet metal fabrication experience (punch press, spotweld, Pem, etc.) would be a plus.

Must be able to read prints and written instructions, use basic inspection equipment and record inspection data. Must fill out other paperwork.

A work history demonstrating a strong work ethic, good quality and good attendance performance.
