POSITION TITLE: MIG/TIG Welder

SUMMARY OF DUTIES

The position involves welding sheet metal assemblies with and without fixtures. The operator must produce good quality parts while working to an hourly production rate. Grinding and packing is also required. Other miscellaneous tasks throughout the shop may be required depending on the workload. Adheres to the QMS requirements.

REQUIREMENTS:

5 years previous welding experience in both MIG and TIG across a variety of metals is required.

Must be able to read prints, weld symbols and written instructions.

Must be able to use basic inspection equipment to verify part quality and record inspection data. Must be able to read, write and speak English.

Must be able to lift metal parts to load and unload fixtures or tools. Some grinding and packing is required. Must work efficiently to a production rate, while making good quality parts.

Robotic welder experience is a plus. Other sheet metal fabrication experience (punch press, turret, laser, spotweld, brakes, Pem, assembly etc.) is a plus.

Must be flexible with regard to work duties. The workload in the shop changes frequently, therefore all employees, including welders are considered multifunctional and required to move around the shop to perform other tasks as needed.
