INC.

Position Title: Estimator / Continuous Improvement Engineer
Supervisor: Vice President
Department: Sales / Manufacturing

Responsibilities:

We have an outstanding role that incorporates two strategic functions into one dynamic role. The candidate will be primarily responsible for quoting new product opportunities, as well as driving our continuous improvement projects from inception to completion. Must adhere to the QMS requirements.

We are seeking an individual with experience in a fast paced job shop environment.

Key requirements:

- 5 plus years working in a sheet metal fabrication and assembly operation working as an estimator or manufacturing engineer.
- Must have a good understanding of processes and methodology necessary to fabricate sheet metal components and assemblies.
- Must have an excellent understanding of blueprint reading and Geometric Dimensioning & Tolerance.
- Must be able to interact with customers, suppliers and internal departments in a cross-functional manner.
- Must have excellent computer and program management skills.
- Must be a change agent and a driving force in the organization.

Desirable

- Experience with Lean Manufacturing practices.
- Bachelors degree in Engineering or similar discipline.
- Experience in designing, documenting & evaluating routers and bill of materials.
- Knowledge in the area of capital & expense justification.
